VVM351

Movable mounting kit

Movable mounting kit providing an extra protection for the door, when mounted in such a way as to prevent the opening of the door when the detector is on the night position plate.

Furthermore it can be wired to inhibit arming of the system when the detector is on the day position plate - thus making it impossible for the staff to forget to shut the door.

Details

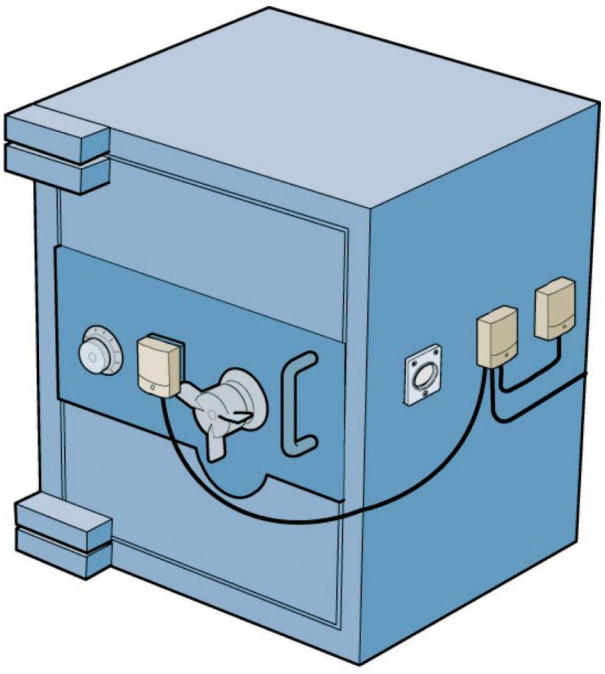

- To prevent opening of the door when the detector is on the night position plate
